# **OVERVIEW: WHAT IS SSPR?**

## The ability to use SSPR to reset passwords and/or unlock user accounts was implemented at Island Health in March 2022.

Self-Serve Password Reset or SSPR is an industry standard methodology for users to create *security questions/answers* that are securely and uniquely linked to their accounts. The answers to the security questions known only to the user can then be provided with other factors to reset Windows/Networks passwords and/or unlock their accounts if required. For all other password resets types, users should continue to contact the Service Desk. SSPR has already been adopted by most other BC Health Authorities.

Prior to the implementation of SSPR, you would have had to call Service Desk for any of the following example services:

- You have forgotten your password.
- You remember your password, but failed to enter it correctly six times in a row within a short period, resulting in your account to be 'locked'.

# SETUP YOUR SECURITY QUESTIONS AND ANSWERS

#### Important Note

Multi-Factor Authentication (MFA) is required prior to setting up and using Self-Serve Password Reset (SSPR). See <u>Multi-Factor Authentication (MFA)</u> Setup for more information. Or call the Service Desk if you require help with MFA Setup

Create your Security Questions/Answers		
1. 2.	Launch your <b>web browser</b> (Chrome, Explorer, Safari, etc.) Type " <b>SSPRsetup.islandhealth.ca</b> " in the address bar, or click on the link below: <u>https://SSPRsetup.islandhealth.ca</u>	<ul> <li>New Tab x +</li> <li>A C △ I Https://ssprsetup.islandhealth.ca</li> <li>IMIT Program Man O apps.viha.ca ○ SNOW ▲ Home - Microsoft A</li> </ul>
3.	Log in using your usual Island Health <b>Username</b> and <b>Password</b>	I Log On

# HOW TO USE SSPR TO RESET YOUR WINDOWS PASSWORD AND/OR UNLOCK YOUR ACCOUNT

SSPR BEST PRACTICES

# **IMPORTANT – Read this First!**

1. SSPR should not be used if you have any other Island Health systems open. BEFORE YOU USE SSPR to Reset your password and/or unlock your account, you must CLOSE ALL Island Health applications and websites (including Citrix Apps, Skype, VPN)

2. You should ALWAYS use SSPR <u>https://passwordreset.islandhealth.ca</u> from a *new* Web browser

session, i.e. not just a new tab

3. After changing your password with SSPR, you should RESTART YOUR DEVICE before logging back in to Island Health Systems

There are two main functions of SSPR:

Why are you having trouble signing in?

● I forgot my password
No worries, we'll help you to reset your password using the security info you registered with us.
<ul> <li>I know my password, but still can't sign in</li> <li>This might happen because you tried signing in with an incorrect password too many times.</li> <li>If you choose this option, you'll keep your existing password and we'll unlock your account so you can sign in again.</li> </ul>
Next

- 1. To reset your password
  - Note: After you have successfully reset your Windows/Network password, remember to RESTART YOUR DEVICE before logging back in to Island Health Systems
- 2. To **unlock your account** after you entered your Windows password incorrectly too many times, *but you do now remember your password*:
  - Note: When you have successfully unlocked your account, there is no need to restart your device.

The next section will take you through the steps to reset your Windows password and unlock your account using SSPR.

INS	STRUCTIONS	
1.	<b>REMINDER:</b> CLOSE all Island Health applications and Island Health websites	
2.	* Launch a <u>new</u> <b>web browser</b> session (Chrome, Explorer, Safari, etc.)	IMIT Program Man  apps.viha.ca  SNOW  Hi
3.	Type " <b>passwordreset.islandhealth.ca</b> " in the address bar, or click on the link below:	* Note: You may leave <u>Non-Island Health</u> prowser tabs open, but you must open SSPR in a NEW browser session
	https://passwordreset.islandhealt h.ca	
4.	Enter your usual Island Health <i>Email Address</i> , e.g. Jane.Doe@Islandhealth.ca	Get back into your account Who are you? To recover your account, begin by entering your email or username and the characters in the picture or audio below.
5.	Enter the characters ( <i>not case-sensitive</i> ) in the picture (or the words in the audio), then click <b>Next</b>	Email or Username: * john.dod@isiandhealth.ca Example: user@contoso.com or user@contoso.com
Op hav I fo	tion 1 (Forgot Password): If you ve forgotten your password, select argot my password and click Next	Get back into your account Why are you having trouble signing in? If longet my password to use the last interpret for easer your password using the security info you registered with us. O I know my password, but till cart sign in The might hegeen because you bind signing in with an incorrect password foor many times. If you choose the option, you'll keep your existing password and we'll unlock your account so you can sign in again for the option.
Op hav but by tim <b>but</b>	tion 2 (Unlock my Account): If you we remembered your password, been locked out of your account incorrectly entering it too many les, select <i>I know my password</i> , t still can't sign in and click Next	Why are you having trouble signing in? O I forgot my password No worries, we'll help you to reset your password using the security info you registered with us. I know my password, but still can't sign in This might happen because you tried signing in with an incorrect password too many times. If you choose this option, you'll keep your existing password and we'll unlock your account so you can sign in again. Next Tancel

## TROUBLESHOOTING AND FREQUENTLY ASKED QUESTIONS (FAQS)

#### Q 1: Who is eligible to use SSPR?

- SSPR is enabled through a user account being added to a group called "VIHA-Azure-SSPR"
- It applies to all new and existing Island health accounts, after users have successfully completed Multi-Factor Authentication (MFA) Setup

#### Q 2: Where do I go to setup my SSPR?

- Go to **SSPRSetup**.islandhealth.ca
- Q 3: Where do I go to use SSPR to Reset my Windows password or unlock my account?
  - Go to **passwordreset**.islandhealth.ca

#### Q 4: When will SSPR be available to me and how will I know?

- SSPR is targeted for implementation at Island Health at the end of March 2022
- Look out for an IM/IT Service Notification advising that SSPR is available
- Follow the <u>SSPR Setup instructions</u> to the **MFA Security info Profile** page, if you are able to add *Security questions* as a new authentication method, then SSPR is available to you

#### Q 5: When should I use SSPR?

- Whenever you have forgotten your Windows password
- When you know your Windows Password, but after multiple failed sign-in attempts, your account may be locked

Q 6: If I have forgotten my password, AND through multiple failed attempts I have locked my account, can I still use SSPR?

- Yes, when you use SSPR to reset your Windows password it will also unlock your account.
- If you are unable to complete this process successfully, you will need to call the <u>BC Health Service</u> <u>Desk</u>

#### Q 7: Does my MFA device have to be connected to WiFi/Cellular?

- This depends on how you have set up your MFA device. As part of the MFA Device setup, your preferred choice of authentication method could be set to:
  - Notification, which does require WiFi/Cellular
  - App Code or Token, which does NOT require WiFi/Cellular
- See the Multi-Factor Authentication (MFA) Sign-in Verification Options for more information including instructions on how to switch between Sign-in methods

#### Q 8: What if I don't have my MFA device with me?

• SSPR requires you to use your preconfigured MFA device. Therefore if you don't have it available, you will not be able to use Setup SSPR, or SSPR Password Reset

#### Q 9: What are the password requirements?

- The 'Strong' Password requirements have not changed with SSPR
- See <u>Network Password Requirements</u> for more information

#### Q 10: How do I change my Security questions?

• Please see <u>How to Change your Security Questions and Answers</u> in this document

#### Q 11: What happens if I forget my Windows password AND the answers to my Security questions?

- Contact the <u>BC Health Service Desk</u> to request a Windows password reset
- Once your Windows password has been reset, follow the instructions in <u>How to Change your Security</u> <u>Questions and Answers</u> to first <u>delete and then re-create</u> your Security Questions/Answers

Q 12: I have forgotten my Windows password. How do I use SSPR if I am using an Island Health device on the Island Health Network (on-site)?

 Using your MFA device (or other personally owned device), follow the instructions above <u>How to Use</u> <u>SSPR to Reset Your Password</u>

# Q 13: I have forgotten my Windows password. How do I use SSPR if I am using an Island Health device using VPN via "accert.viha.ca"?

- 1. Using your MFA device (or other personally owned device), follow the instructions above <u>How to Use</u> <u>SSPR to Reset Your Password</u>
- 2. Once you have successfully recovered your Windows password, **you need to go on-site** and obtain a successful connection through an Ethernet (cable) or Island Health Wifi
- 3. When you are connected, log in to your Island Health device using your NEW Windows password

# Q 14: I have forgotten my Window password. How do I use SSPR if I am <u>off site</u> and using my personally owned device to log in to Island Health systems (e.g. Intranet, Webmail, Citrix Gateway, etc)?

- 1. Follow the instructions above How to Use SSPR to Reset Your Password
- 2. Once you have successfully recovered your Windows password, log in to your Island Health applications using your NEW Windows Password

#### Q 15: Can I use SSPR to proactively change my password?

• Yes, you can proactively change your Windows password using SSPR. However, it is recommended that you use the standard procedure as described in <u>How to Change your Network Password</u>

## **DO YOU NEED MORE HELP?**
