

ImmsBC Orientation for Island Health Long Term Care & Community Health Services Vaccine Providers

ImmsBC is a provincial system for appointment booking, vaccine inventory management and documentation.

This document is specific to **Island Health** staff who administer vaccines in **Long Term Care** and **Community Health Services** and who **Create Immunization Record (CIR)** without appointments.

Education materials are provided by Public Health Services Authority (PHSA) & Provincial Public Health Information Systems (PPHIS), with additional guidance from Island Health PPH Information Systems.

To receive an ImmsBC user account, vaccine providers must complete the self-guided learning below and submit the Island Health education declaration (linked below).

Description	Education Links
Learning Hub Course (1 hour)	<input type="checkbox"/> Complete Learning Hub course # 34291 <i>PHSA – PPHIS - Getting Started in ImmsBC</i>
