

Help prevent the spread of measles

If you have any of the following symptoms, you could be contagious. Please inform a health care provider as soon as possible.

Fever or chills

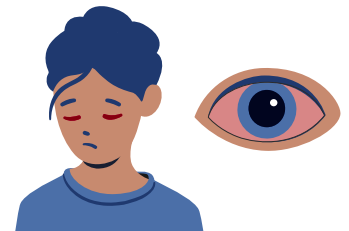

Runny nose

Cough

Rash

Sore red eyes

If you have been exposed to measles or another communicable disease, please inform a health care provider.

Clean your hands before and after visiting.

Use hand sanitizer or soap and water.

Wear a medical mask if you have symptoms (if able).

Cough or sneeze into a tissue or your elbow and do not touch your face.
