

User Profile Settings

Information for healthcare professionals

Purpose:	To provide guidance on the different profile settings specific to a user and how to configure them.
-----------------	---

User Profile – Updating Notification Settings

Notification settings can be adjusted in order to receive various event notifications from BC Virtual Visit. Notifications in general can be received three ways depending on how your profile is configured and how you are accessing BC Virtual Visit:

- **SMS (Text Message)** - Sent to the phone number entered in your BC Virtual Visit profile.
- **Email** - To the email associated with your BC Virtual Visit log in.
- **Browser**- Pop-up notification when you are logged into BC Virtual Visit on a browser.

To configure your notification settings → Click on your user menu, then select **settings** from the dropdown

You may then select which types of notifications you would like to receive. See below for details regarding each notification type as well as how each is triggered.

NOTE: Please be mindful that many of these are applied either at a waiting room level or system wide.

- **Waiting Room Level (WRL)** – enabling these will trigger notifications for appointments for all assigned waiting rooms. If you are in a **shared** waiting room, notifications will apply to appointments in all of your waiting rooms; meaning you may receive notifications for appointments that are not your own.
- **System Wide (SW)** – enabling these will trigger notifications for changes to any patient profiles in the system.

User Profile – Using a Nickname in Video Calls

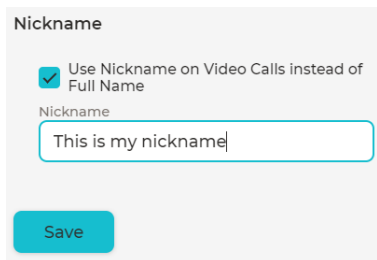

BC Virtual Visit users have the ability to configure a nickname that will be displayed to the patient during the video call instead of their full name listed in the profile.

NOTE: Please refrain from changing your first name and last name in BC Virtual Visit, as they are used for account management purposes. Instead, you may add a preferred name using the Nickname option as described below:

Step 1: Click on your user menu as displayed in the image below

Step 2: Click on “profile” from the dropdown menu above to see an option for “Nickname” as shown below

A screenshot of the 'Nickname' settings form. It has a title 'Nickname' and a checked checkbox labeled 'Use Nickname on Video Calls instead of Full Name'. Below the checkbox is a text input field with the placeholder text 'Nickname' and the value 'This is my nickname'. At the bottom of the form is a blue 'Save' button.

Step 3: The image below shows an example of what this would look like in the video call. All participants in the video will see your name in the video icon as the text entered in the field above.
